**MUNSON INC. CELEBRATES 50-YEARS OF INNOVATION:
Unique Fencing/Pavement Demonstration Project Can Be Viewed Online.**

GLENDALE, Wis. – Munson, Inc., a paving, fence and tennis court contractor in Glendale, Wisconsin, is celebrating its 50th anniversary of business in 2005. As part of its year- long celebration, Munson is dramatically expanding its exterior showroom, utilizing various fencing samples and a wide range of asphalt and concrete paving options. The project will continue through the month of August.

“We will celebrate this milestone in many ways,” says Robert Fetherston, president of the company. “Yet one key thing we wanted to do was dramatically display our capabilities. Our new entranceway, complete with imprinted asphalt and concrete, is just one way to do this. The project is an exciting one and has been requested for nomination for a popular industry award.”

The new show place already includes various concrete and asphalt patterns such as Ashlar Slate, Brick Fan, London Cobblestone and others in colors that include Philly Blue, Victorian Red, Maplewood and Dover Blue. Other patterns and colors in concrete and asphalt will be part of the finished project. The fencing samples will include vinyl coated chain link, wrought iron styles in steel and aluminum, and PVC in various designs. This unique project can be seen on the company website, **www.munsoninc.com**.

The entranceway and outdoor show area is just the next phase in the celebration of the golden anniversary. Earlier this year Munson brought back its regionally-known

tennis court seminar and the company also unveiled a new logo for the year, highlighting the 50-year milestone.

“Many people and businesses recognize Munson for either our fencing division or our Munson-Armstrong paving division,” says Fetherston. “The 50th anniversary logo incorporates the words ‘fence,’ ‘asphalt,’ and ‘concrete’ to help communicate that Munson handles all of these services under one roof. Our mission has always been to provide quality and service. It was the key to Munson being in business for fifty years and will be the foundation for the next fifty years.”

Founded in 1955, Munson has continued to grow in size, capacity, and offers a continually expanding range of products. Over the last decade Munson, Inc., has become known as one of the premiere decorative stamped concrete contractors. The company was the first in the Milwaukee area to offer StreetPrint, a color and imprinting process for asphalt, popular in residential, commercial, and municipal applications.

“We’ve been successful because we hire the best people and we haven’t been afraid to try something new,” says Fetherston. “Our diversity within each division allows us to give our customers the designs of their dreams. It is projects like those that set us apart from other companies. We treat our employees like family and everyone’s efforts are recognized.” This formula has led to numerous national and statewide design and construction awards, as well as top safety awards. Munson continually strives to maintain the best reputation, while aggressively pursuing opportunities for growth. It remains dedicated, just like it was 50 years ago, to quality and service.
