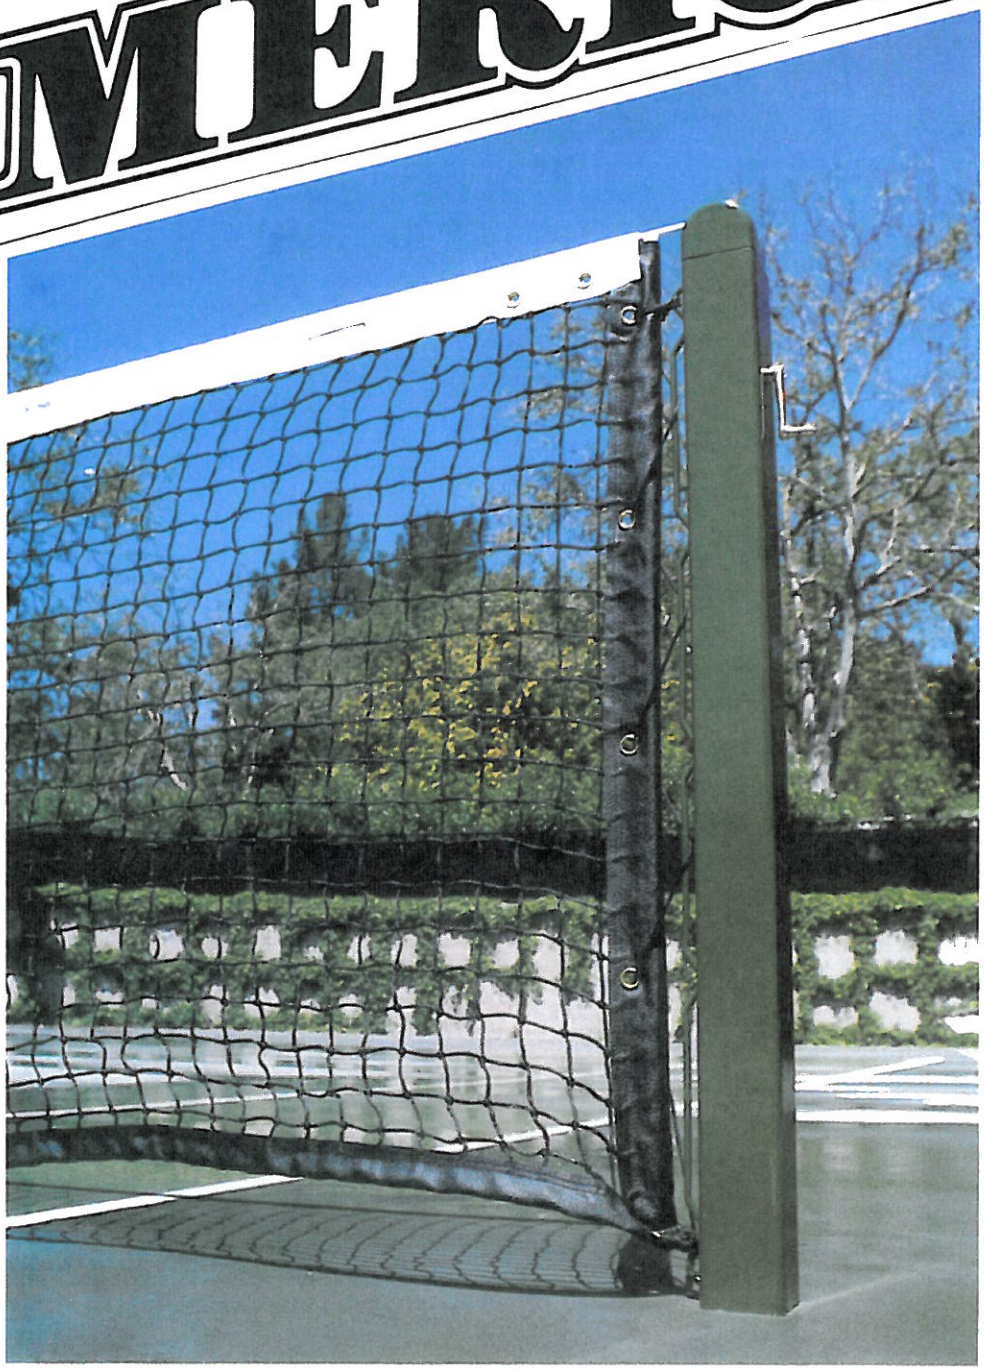
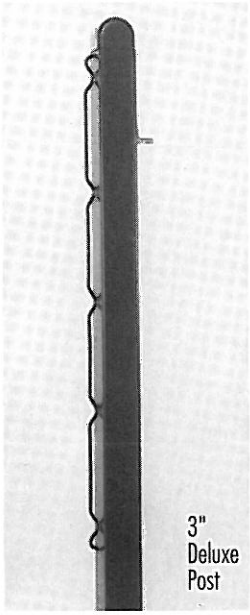
NO POST BEATS AMERICAN



AMERICAN TENNIS NET POSTS
Durable, Stylish, & Made in America

The ATA Posts

- Dress up the "Old" look
- Upgrade your court or club
- Improve the attractiveness of your facility
- Get rid of that dangerous external crank
- End those ripped pockets and bruised hips



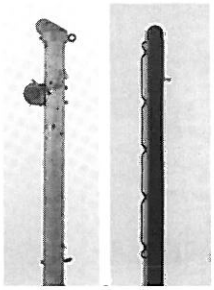
3" Deluxe Post

- 3" HEAVY GAUGE Square Steel Posts
- Posts are COMPLETLY COATED with thick BAKED - ON - VINYL coating. More durable than urethanes and enamels. Vinyl resists chipping and fading.
- The VINYL coating creates a seal with the vinyl coating on the heads to make the post-gear- system completly rain proof and rust proof.
- Available in green and brown. Other colors available on special order.
- Posts for platform and paddle tennis are available with all he above features.

REPLACE your old, worn, rusted external crank posts with new ATA internal winder posts

Which Is Your Style ?

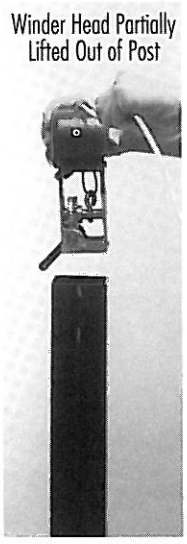
THIS or THIS?



INSTRUCTIONS

1. Simply lift out or torch off the ugly existing post
2. Drop in the ATA ADAPTER NET POST designed to fit any and all existing round sleeve or cut off old post.

Heads and Gear Mechansim

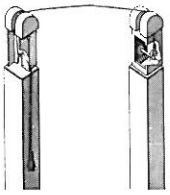


Winder Head Partially Lifted Out of Post

Completely hidden
INTERNAL WINDING GEAR MECHANISM.
NO UGLY GEARS OR FITTING VISABLE. Only two moving parts to ensure trouble free life. Gears are solid brass or stainless steel and housed in an aluminum head and are therefore 100% rust-proof, weather- proof and jam-proof!

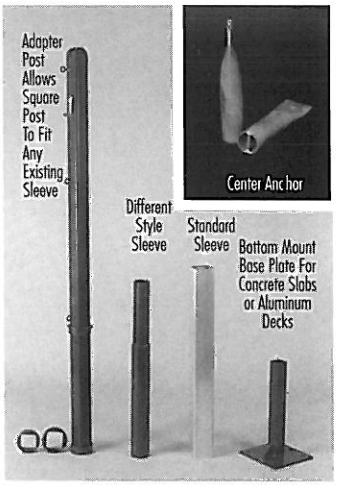
EASILY REMOVEABLE HEAD
allows convenient seasonal removal, replacement and storage of net. With gears attached to the throat of the removable head, rather than affixed to the post itself, removal is a breeze. Simply loosen the net a little, lift heads out of post, place in center of net and roll up to store.
GUARATEED TO BE TROUBLE FREE.

Removable head
allows net to be removed and replaced without having to deal with or replace frayed cable ends.

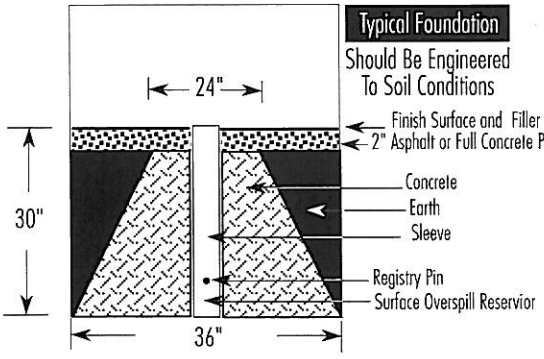


ATA ELIMINATES the troublesome need of cutting the net cable on all double swedge net cables - USE THE ATA HOOK. On long single swedge cables, remove the hook, use its hole, and cut the cable. TROUBLE FREE INSTALLATION.

Sleeves



Numerous sleeves have been designed for many applications.



Typical Foundation

Should Be Engineered To Soil Conditions

ONE COMPLETE SET INCLUDES

- Net Posts

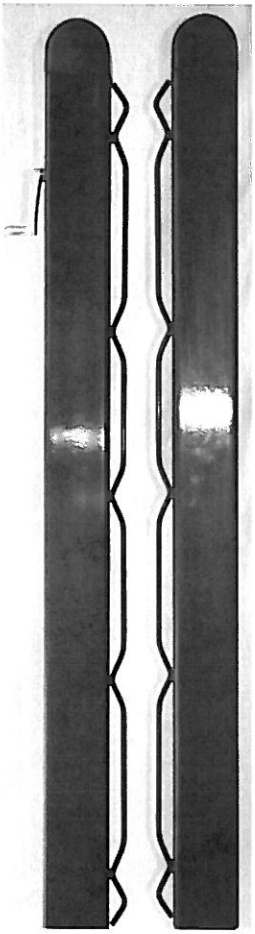
NOTE : Sixteen years of design research and infield use have demonstrated the superior use, concept and value of the removable head/gear system.

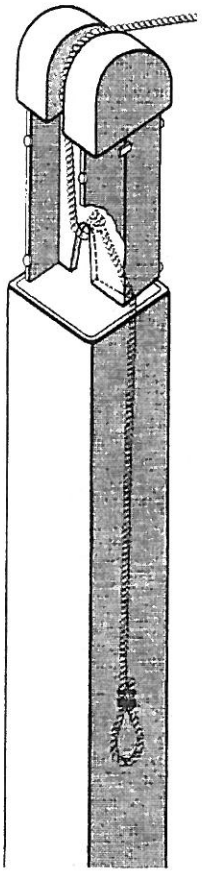
AMERICAN TENNIS ACCESSORIES

DURABLE, STYLISH & MADE IN AMERICA

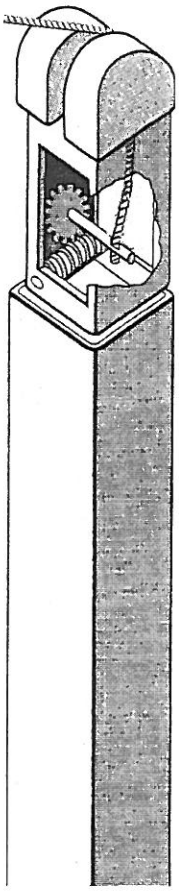


- HEAVY GUAGE SQUARE STEEL POSTS
- WELDED STEEL LACING ROD
- POSTS ARE COATED WITH BAKED ON POLYESTER COATING. INCLUDING MILDEW, UV & SALT CORROSION INHIBITORS
- UPGRADE YOUR COURT
- GET RID OF THE DANGEROUS CRANK
- EASILY REMOVABLE HANDLE
- STANDARD COLORS ARE GREEN & BLACK

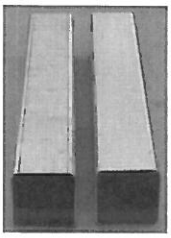
SIMPLE INSTALLATION



1.Cut off the cable swage on one end of the net cable. Insert cable end over pulley and insert end about 1/2" through hole in brass shaft. With the handle turn shaft about 1/2 turn and place head with cable in post. Attach handle.
2.Stretch out net and cable tightly across court. Pull cable over groove on dead head and back down the side of post. with the cable stretched hand tight, mark cable about 10" below top of post.
3.Tie a "typical" overhand knot at mark. Lift dead head out of post and place knot on court side of the "V". Let the excess cable hang inside the post. There is no need to cut excess off.
4.Return to the winder head and crank to correct net height. Usually about 3 or 4 rotations



SLEEVES



SLEEVES ARE ALUMINUM EXTRUSION EXTRUSIONS NO RUST OVER THE YEARS
